2 BACKGROUND INFORMATION

2.1 About State Designated Agency (SDA)

The mission of State Designated Agency (SDA) and Bureau of Energy Efficiency (BEE) is to develop policies and strategies with a thrust on self-regulation and market principles, within the overall framework of the EC Act with the primary objective of reducing energy intensity of the Indian economy. This will be achieved with active participation of all stakeholders, resulting in accelerated and sustained adoption of energy efficiency in all sectors.

The EC Act came into force in March 2002. The setting up of Bureau of Energy Efficiency (hereinafter referred to as the "BEE") and subsequently ASDA as one of the SDA provides a legal framework for energy efficiency initiatives in the country. The EC Act empowers the Central Government and in some instances the State Governments to:

Notify energy intensive industries, other establishments, and commercial buildings as designated consumers;

Establish and prescribe energy consumption norms and standards for designated consumers;

Direct designated consumers to –

- Designate or appoint certified energy manager in charge of activities for efficient use of energy and its conservation.
- Get an energy audit conducted by an accredited energy auditor in the specified manner and intervals of time;

Furnish information with regard to energy consumed and action taken on the recommendation of the accredited energy auditor to the designated agency;

Comply with energy consumption norms and standards, and if not so, to prepare and implement schemes for efficient use of energy and its conservation;

Prescribe energy conservation building codes for efficient use of energy and its conservation in commercial buildings;

Amend the energy conservation building codes to suit regional and local climatic conditions;

Direct owners or occupiers of commercial buildings to comply with the provisions of Energy Conservation Building Codes;

Direct mandatory display of label on notified equipment and appliances;

Specify energy consumption standards for notified equipment and appliance;

Prohibit manufacture, sale, purchase and import of notified equipment and appliances not conforming to standards.

The EC Act defines the powers of the State Government to facilitate and enforce efficient use of energy and its conservation. The State Governments have to designate State Designated Agencies in consultation with the Bureau of Energy Efficiency to coordinate, regulate and enforce the provisions of the Act in the State. Thus the State Designated Agencies are the strategic partners for promotion of energy efficiency and its conservation in the country.

2.2 Organization: Chief Electrical Inspector -cum- Adviser, Assam.

This will be achieved with active participation of all stakeholders, resulting in accelerated and sustained adoption of energy efficiency in all sectors.
